

GENESIS®

FASTPRINT

Conditioning Dampening Rollers Has Never Been This Easy.

Genesis® FASTPRINT is a dampening roller desensitizer and conditioner. FASTPRINT removes contaminants and wash up chemicals from the micro pores of chrome and compound (rubber) rollers leaving them hydrophilic (water loving).

The dampening roller system must attract water and repel ink. By utilizing FASTPRINT to desensitize and condition dampening rollers, rollers last longer, water transfers more efficiently and ink feedback is reduced. FASTPRINT will not contaminate fountain solution in water pans or circulation systems.

FASTPRINT can also be used as a plate conditioner to assist with improving make ready and restarts and as a scratch remover.

- ZERO VOC
- ZERO SARA title 313 chemicals or Hazardous Air Pollutants (HAP's)
- Meets SCAQMD Rule 1171 Requirements

How to Use:

Metering/Chrome Roller Desensitizer & Conditioner

FASTPRINT is applied to metering and chrome rollers after they have been wiped clean with Genesis BRIGL Wash. Apply one or two heavy lines of FASTPRINT to the rotating metering and chrome rollers.

Plate Desensitizer & Conditioner:

Engage dampening form to the plate and allow to rotate at a slow idle. Apply one or two heavy lines of FASTPRINT to the metering or chrome roller and allow plate to make 4-6 revolutions.

PACKAGING

Quart (9 per case)
2.5 Gallon Cube
5 Gallon Cube
30 Gallon Drum
55 Gallon Drum
